Rod Allen B. Agregado
Manager
ProfDev Inc.
Santiago City, Isabela, Philippines

Dear Mr. Agregado,

I am writing to apply for the Junior Front End Developer position at ProfDev Inc., as advertised in your recent job posting. I am currently a third-year Bachelor of Science in Information Technology student at Northeastern College and expect to graduate in 2028. I am eager to contribute my developing technical skills to your team while gaining experience in a professional environment.

Through my academic work, I have gained hands-on experience in web and mobile development. I worked on a CBGFitness Center Management system using PHP, Flutter (Dart), and Supabase; a student task manager application; and a food and recipe search application that uses a REST API. These projects allowed me to practice building real-world solutions, from developing application features to managing data and applying core programming concepts.

I want to join ProfDev Inc. because I value the opportunity to learn from experienced developers and strengthen my skills. I am confident that working with your team will help me continue to grow as a developer while contributing to your projects.

Thank you for considering my application. I would welcome the opportunity to discuss my educational background, my eagerness to learn, and how I can add value to your team. I have attached my resume for your review.

Respectfully yours,

Lyzzah Mhae Artillera Garcia
